Director Mackey,

I wish to register my objection to Item B, allowing utility-scale energy systems in the AZD and to changing AZD definitions. For centuries, this has been an agricultural county & we have continued to protect farmland through zoning & Ag easements. There needs to be a critical mass of farms in an area to support the ag supply businesses necessary to ease of farm operation. Depletion of farm acres through non-farm uses potentially jeopardizes the viability of those businesses, thereby hurting farmers. This isn't a nostalgic look back, but a plan for future agriculture to feed our growing population. Thank you.
